

Tokyo Keiki Construction Systems, integrated into Electronics Systems Division

Dear valued customer and associate,

We would like to formally announce the transfer of all of the activities of Tokyo Keiki Construction Systems, a wholly owned subsidiary of Tokyo Keiki Inc. - activities which include sensing products and control systems for the construction sector - to our parent company's Electronics Systems Division, effective 30 September 2010.

This change will enable us to capitalize on the proprietary technology and knowhow we have developed and nurtured in the markets served by Tokyo Keiki Construction Systems and integrate these strengths with the sensor technologies and related manufacturing expertise of our Electronics Systems Division as we focus on expanding our growth and presence in this business.

Moving forward, we will continue to sharpen our technologies as well as pursue development of new technologies and products in responding to the sophisticated needs of our customers and we sincerely will welcome your continued support and encouragement in these efforts.

With the dissolution of the Tokyo Keiki Construction Systems subsidiary on 30 September, may we take this opportunity to express our deep appreciation to you for the kind support and patronage you have extended to us over the years. As part of the Tokyo Keiki Electronics Systems Division, we shall look forward to enhancing our relationship with you in the days ahead.

___ September 2010

Tatsuyuki Ochi, President
TOKYO KEIKI CONSTRUCTION SYSTEMS INC.

Ken Waki, President
TOKYO KEIKI INC.
